

# THE JAS EZ PRONATION/SUPINATION

## ADVANCED TURNBUCKLE TECHNOLOGY

The JAS EZ Pronation/Supination offers full-range, bi-directional Range of Motion (ROM) therapy – 110° pronation, 130° supination – in a light-weight, low-profile, single-patient use device. An innovative motion arc design, combined with infinitely adjustable ROM, assures precise end-range stretch throughout the entire treatment session. Maximal Total End Range Time (TERT) is achieved for optimal therapeutic benefit.

### JAS QUALITY AND PERFORMANCE IN A SINGLE-PATIENT USE DESIGN

**JAS EZ Pro/Sup ROM**  
**110° Pronation**  
**130° Supination**

**Lightweight,  
Low Profile**

**Wrist Stabilized,  
Pure Forearm  
Rotation**

**Optimal Comfort  
and Compliance**

JAS engineering assures pure forearm rotation: A two-piece, adjustable hand support system stabilizes proximal and distal to the wrist joint – protecting the wrist from any torsional loads during ROM therapy. All rotational forces are effectively delivered along the forearm, safely maximizing stretch loads.

The JAS EZ Pronation/Supination utilizes proven principles of stress relaxation to achieve permanent restoration of joint ROM in three 30-minute sessions per day.

Features:	Benefits:
Hand support stabilizes wrist	Eliminates torque across wrist; precise isolation of forearm rotation
Lightweight, easy to apply and simple to use	Promotes excellent patient compliance
Works in pronation and supination	Saves cost; full-range stress relaxation therapy in one device
Patient-controlled, infinitely adjustable ROM	Assures precise and pain-free end-range stretch; virtually eliminates muscle guarding
30-minute treatment sessions	Dramatically reduced treatment time ensures high patient compliance
